---

I was not quite correct. The UC Excel file also included BMI and Age at X-ray.

Bob Benson---09/24/2012 02:36:29 PM---Thank you. The Excel file is the full data set (n = 434) that Region 8 created from those examined i

Thank you.

The Excel file is the full data set (n = 434) that Region 8 created from those examined in 1980 and those re-examined in 2002-2005 (eliminating those with previous exposure to asbestos and using only 1 health exam for each person). I think this matches the file for the data set posted on the SAB site.

I assume that the requestor had to sign a non-disclosure agreement to get the second file with specific date of hire.

"Hilbert, Timothy (hilbertj)" ---09/24/2012 05:53:49 AM---Bob, Here are the data that were released. Tim

**Subject:** Marysville Data Released by UC

The public comments to the SAB regarding the SAB Panel's draft report states that UC released the Marysville data.

Tim,  
Do you have a file with the actual data that was released?

Bill,  
The Hoel and Moolgavkar comment (page 4, #2) claims that age is a strong confounder. Do you have an idea of how that analysis would be done?[attachment "EPA Table 1 to UC Lawyers FOIA 07192012.xlsx" deleted by Bob Benson/R8/USEPA/US] [attachment "EPA Table 2 to UC Lawyers FOIA 07192012.pdf" deleted by Bob Benson/R8/USEPA/US]
